

## **Evenco International Covid-19 Safety Measures**

As we make our transition back from digital to live events, we at Evenco International want to ensure all our event attendees that your safety is our number one priority. The below measures and precautions will be implemented across all upcoming live events from October 2021 and beyond, to ensure that we as event organisers are doing everything possible to maintain a COVID-secure environment.

We want to make sure that our attendees have the upmost confidence that our events will adhere to the latest government guidelines to keep you and your fellow peers safe. To guarantee this, Evenco International have conducted a thorough COVID-19 risk assessment based on both industry and government guidelines that we will address in our event planning strategy. In doing so, we believe all our Evenco International events will run smoothly and enable attendees to gain the invaluable insight, experiences and business connections that our events are guaranteed to provide.

### **Please read our live events health and safety measures below:**

- Only a maximum of 20 investors/attendees will be permitted into each live event. All seating areas for attendees will be socially distanced and protective screens will be in place for networking.

- Chairs, tables and all areas will be disinfected before the event. Anti-bacterial sanitiser bottles will be accessible on all tables and networking areas.

- A Centralised air-ventilation system will be on at all times.

- Where it is possible, we will carry out a contactless registration process. This may mean attendees will need to sign themselves in for the event and collect their own badges and lanyards.

- Entering and leaving the venue will not take place at the same time as all guests to avoid crowded areas.

- Private taxis will be offered as an alternative to public transportation.

- Vaccination passports will be required upon entry. Instant COVID tests will also be provided as an optional precaution if delegates wish to take one upon arrival.

- No exchanging or sharing of corporate gifts will be permitted. Corporate gifts will be allocated directly.

- All food will be warm, strictly handled, individual portions, and served by a waiter wearing a face mask. Water bottles will be provided to all guests for private consumption.

- We will also adhere to the specific guidelines of each venue that we host an event, to ensure that we follow any additional measures they may have in place to reduce any spread of transmission.
